DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-9, 11-14 and 16-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Telefus (6,370,039).

Telefus discloses an isolated power converter having primary feedback control in Figs. 1A-1C, 6A and 6B. An input power conditioning circuit (5), power control circuit (2), input signal indicative of input power (Vint feedback), output signal indicative of output power (Ipri feedback), estimator circuit (13), power factor correction 20, bus capacitor (30), input current signal indicative of input current (6), input voltage signal indicative of voltage (4).

Allowable Subject Matter

3. Claims 10 and 15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
4. The following is a statement of reasons for the indication of allowable subject matter: None of the cited prior art disclose or teach a power control circuit with the power output signal indicative is derived for measurement of at least one of a torque and velocity output.
